

Queries

New Branch Queries

1. allow the admin and superadmin to access the sub branch system

```
set @new_branchid = [wid of new branch];
```

```
Delete from `userbranch`  
where branchid = @new_branchid  
    and userid in (100000001,1);
```

```
Insert into `userbranch`  
(userid, branchid)  
values  
(100000001, @new_branchid),  
(1, @new_branchid);
```

2. Add new branch to the database then use this query to sync the new branch to other existing branches

```
set @new_branchid = [wid of new branch];  
set @branch_to_copy_price_from = [existing branch wid to copy the price from];
```

```
INSERT INTO `sync` (`tablename`, `wid`, `branchid`)  
SELECT  
    'branch', @new_branchid, `wid`  
FROM `branch`  
WHERE `wid` > 10  
    AND `wid` <> @new_branchid;
```

3. Insert new branchprice of new branch

```
set @new_branchid = [wid of new branch];  
set @branch_to_copy_price_from = [existing branch wid to copy the price from];
```

```
DELETE FROM `branchprice`  
WHERE `branchid` = @new_branchid;
```

```
INSERT INTO `branchprice`  
(  
    `branchid`,  
    `productid`,  
    `purchaseprice`,  
    `sellingprice`,
```

Queries

```
`wholesaleprice`,
`maxquantity`,
`minquantity`,
`packagepurchaseprice`,
`packagesellingprice`,
`packagewholesaleprice`,
`packageqty`,
`ispackage`
)
SELECT
    @new_branchid,
    `productid`,
    `purchaseprice`,
    `sellingprice`,
    `wholesaleprice`,
    `maxquantity`,
    `minquantity`,
    `packagepurchaseprice`,
    `packagesellingprice`,
    `packagewholesaleprice`,
    `packageqty`,
    `ispackage`
FROM `branchprice`
WHERE `branchid` = @branch_to_copy_price_from ;
```

4. sync new branchprice to other branches (if branches are > 20, ask if this should be executed)

```
set @new_branchid = [wid of new branch];
DELETE FROM `sync`
WHERE `tablename` = 'product';

INSERT INTO `sync` (`tablename`, `wid`, `branchid`)
SELECT
    'product', P.`wid`, B.`wid`
FROM `product` AS P, `branch` AS B
WHERE B.`wid` > 10
    AND P.wid > 10
    AND B.`wid` <> @new_branchid;
```
